# Description

## Financial management

How to work with the finances in entrepreneurship context

## & Developing an educational material for potential entrepreneurs

The **GENERAL AIM** of the project is offering learning and training opportunities through an integrated entrepreneurial training program by 4 organizations from Europe. This aim will be reached according to the following

### **SPECIFIC OBJECTIVES:**

- O1: Developing entrepreneurial competences for 100 adults from Europe, by implementing a future business during the 24 months of project;
- O2: Acquiring competences in the field of entrepreneurial education for 32 adult trainers;
- O3. Growing the organizational capacity for transnational collaborations for dissemination of the results, and the methods used within the project

# Organization evaluation

To me it was perfect. I wouldn't do it better. Not even close. It was my first experience with non formal education, so it was quite impressive to me to learn with such a "little effort,,

Nothing to say. It was really great.

The organisation of the event was good. Enough and good quality materials. I noticed a well done preparation. The venue far away from the city was a bit time consuming for me, but it was manageable. The facilitation was professional, done by a experienced facilitator. I appreciate this a lot.

The workshop was based on NFE about financial management. The workshop will give SKA need for the financial management and to help give to community the proper tools to know the right SKA for them to start their own business or project.

One of the best E+ projects I have ever been to. Really good presentation of non-formal education.

It was really inspiring and motivating.

I spent 7 days in a beautiful place with great people and I learned interesting things about how to develop an WSP, and about foreign culture also.
